Work Experience

Live Cristle

Jan 2025 – Present

Full Stack Developer

Bangalore, India

- Forged a user-friendly dashboard utilizing React.js that visualized key performance indicators; personally wrote 500+ lines of code, and fixed 10+ bugs per week, improving data accessibility.
- Enhanced application loading speeds by 30% through strategic code refactoring and image optimization techniques, directly improving user engagement and decreasing bounce rates, which led to a 15% rise in conversions.
- Implementing secure authentication and user management systems.

Skill Safari

Jan 2024 – Aug 2024

Associate Trainer & Developer

Coimbatore, Tamil Nadu

- Designed web-based training platforms, improving student engagement by 20%.
- Developed interactive coding challenges to reinforce learning.

Tiruppur Smart City Ltd.

Nov 2021 – May 2023

Trainee Engineer

Tiruppur, Tamil Nadu

- Developed and maintained smart city web applications.
- Led a team in optimizing digital infrastructure, reducing data processing time by 40%.

Projects

E-commerce Website (Vite, React.js, Tailwind CSS) (Live Demo)

- Built a fully responsive e-commerce platform, increasing sales by 35%.
- Implemented efficient product browsing, filtering, and cart features.
- Optimized page load speed by leveraging lazy loading and code splitting.
- Integrated secure payment gateways to ensure smooth transactions.
- Enhanced SEO to improve discoverability, leading to a 20% increase in organic traffic.
- Implemented user authentication and role-based access control.
- Developed an intuitive admin panel for product and order management.

Responsive Landing Page (JavaScript, Tailwind CSS, EmailJS) (Live Demo)

- Designed a dynamic, high-converting landing page for better user engagement.
- Used Tailwind CSS for a sleek, mobile-friendly UI design.
- Integrated EmailJS to enable real-time email submissions.
- Optimized animations and transitions for a modern and engaging user experience.
- Implemented A/B testing to measure and improve conversion rates.
